PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience delivering scalable, high-performance web applications. Proficient in **React, JavaScript, TypeScript, Node.js, Express.js, PostgreSQL,** and **Java** with **Spring Boot,** specializing in frontend architecture design, backend services, RESTful APIs, database management, performance optimization, and responsive UI development. Experienced in collaborating within Agile teams to deliver secure, scalable, and maintainable end-to-end software solutions.

EXPERIENCE

Vyoog Information Private Limited - Software Engineer
11/2021 – 03/2025 | Coimb atore, India
Project: ERP System

- Fixed critical bugs and en hanced legacy enterprise applications, improving system stability, application performance, and long-term maintainability.
- Collaborated with clients to gather business requirements and delivered end-to-end features across **frontend** and **backend** modules within **Agile** sprint cycles.
- Developed scalable web applications using **Groovy/Grails, JavaScript, jQuery,** and **React**.
- Optimized complex **SQL** queries in **PostgreSQL**, reducing query execution time by **~25%** and improving reporting efficiency and data consistency.
- Contributed to migrating legacy **MVC-based Groovy/Grails (Java 7)** application to **SpringBoot** and **microservices** architecture, improving system scalability, maintainability, and data retrieval performance by approximately **25%**.
- Delivered scalable and maintainable solutions across the full project lifecycle, streamlining processes through close collaboration with cross- functional teams.

Elumitas India - FrontEnd Engineer
03/2025 – 04/2026 Coimbatore, India
Project: Executive Insights

- Migrated **Angular** application to **React** with **TypeScript**, improving initial load time by **~35%** and reducing unnecessary re-renders through optimized architecture. Created reusable components to enhance scalability, maintainability, and accelerate feature delivery.
- Built dynamic analytics dashboards using **Plotly.js** with interactive visualizations, enabling real-time data analysis, improving business reporting accuracy, and supporting faster strategic decision-making.
- Enhanced application performance by approximately **30%** using **React Query** for **API** caching and background synchronization, while managing centralized state with **Redux** for predictable data flow and efficient component communication.
- Integrated and supported backend **API** services using **Node.js** and **Express.js** for data handling, **API** communication, and feature enhancements across web applications.
- Applied **AI** coding assistants such as **GitHub Copilot** and **ChatGPT**,**Codex,Claude** to enhance code quality, streamline debugging, and improve development efficiency across frontend and backend tasks.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, TypeScript, Tailwind CSS, Bootstrap, jQuery.

Backend: Node.js, Express.js, Next.js, Java, Groovy (Grails), SpringBoot.

Database: PostgreSQL, MySQL, MongoDB.

AI : RAG, MCP.

Tools & Platforms: VS code, Postman, Git.

Web Services: RESTful API Development (GET, POST, PUT, DELETE).

PROJECTS

E-Commerce

Tech Stack: Node.js, Express.js, MySQL.

- Implemented **JWT**-based authentication for secure, stateless user login and applied role-based authorization to restrict access based on user roles.
- Architected backend systems with secure database operations, **CRUD** functionality, and efficient API design, ensuring scalable and maintainable application performance.
- GitHub: https://github.com/Manoj0712/E-commerce

Personal Finance Management System

TechStack: React, TailwindCSS, Node.js, Express.js, PostgreSQL.

- Designed and built a personal finance application with transaction tracking, budgeting, and financial planning, implementing structured data handling and dashboard-based analytics for improved financial visibility.
- Built analytics-driven features such as spending insights, goal tracking, and debt payoff planning, leveraging efficient data processing and state management for real-time updates and performance.
- GitHub: https://github.com/Manoj0712/Personal-Finance-App

ADDITIONAL INFORMATION

- Strong understanding of **Agile** development methodologies.
- Strong working knowledge of **MVC (Model-View-Controller)** architecture for scalable application design.
- Hands-on experience with **RESTful API** design and integration.
- Proficient in version control using **Git** for collaborative development.
- Understanding of **performance** optimization and **clean code** practices.
- Understanding of **RAG (Retrieval-Augmented Generation)** concepts for improving AI responses through external knowledge retrieval and context-aware generation.
- Familiar with **MCP (Model Context Protocol)** concepts for structured AI interaction with external tools, APIs, and data sources.
- Utilized **AI**-assisted development tools such as **GitHub Copilot** and **ChatGPT, Claude** within **Visual Studio Code** to improve coding efficiency and overall productivity.

EDUCATION

06/2018 – 05/2021 Coimbatore	**B.Sc. in Information Technology** Sri Ramakrishna Mission Vidyalaya College of Arts And Science CGPA: 7.67
06/2017 – 03/2018 Tiruppur	**Higher Secondary School Certificate** Government Higher Secondary School, Karuvalur Percentage: 81.67
06/2015 – 04/2016 Tiruppur	**Secondary School Certificate** Government Higher Secondary School, Karuvalur Percentage: 87
